

● **Total Sanitation Campaign (TSC)**

Total Sanitation Campaign is an essential component of Total Health Programme In our country especially in rural areas, ill health is predominantly a result of unhealthy living conditions including unsanitary disposal of human excreta and other solid and liquid wastes.

Now, Installation of House Hold Latrines has almost been covered in our district.

Besides, a School Sanitation Programme has launched in this district to provide Toilet Complex in the Primary Schools, SSK, MSK, ICDS & High School of the district where such facility was lacking.

Infrastructural facilities had been created by installing Rural Sanitary Marts (8) and additional production centers in 25 Blocks of the District so that peoples awareness and demand can be substantially increased and sanitary appliances can be provided at a reasonable cost.

A net work of **Water Testing Laboratories (9)**, **Solid Liquid Waste management (1)**, **Bio Gas Projects (3005)**, **Swajaldhara (123)** have been set up in this District with a view to transforming the District to a fully sanitized one.
